Volume 8

Battery Backup Can Be More Vital Than You May Think

For many years, your home phone would allow you to stay connected to emergency voice services during a power outage. However, many of today's advanced home phone services require backup battery power to continue functioning during an outage. To avoid a disruption of home voice service during an outage—and to maintain the ability to connect to 911 emergency services—we at DTC install one battery backup, at no cost to the homeowner.

Need a longer backup time?

In rural areas such as ours, we understand that storms can impact power outages that last anywhere from a few hours to a few days. Maintaining reliable lines of communication – to distribute necessary information, coordinate emergency response and rescue if needed, and stay in touch with loved ones – is a critical component of public safety.

By purchasing additional battery backups, you can ensure that you have a landline that is available to use for a longer period of time. In the event of a lengthy power outage, having 24 hours of battery backup can greatly impact your household. For just \$1.99 each per month you have the option of leasing additional backup batteries. Each additional battery will provide another 8 hours of service. Add a maximum of 2 additional batteries for a total of 24 hours of backup power for your home phones.

Come by DTC to learn about our services, support our local scholarship fund with great raffles, and grab a free lunch!

DTC FIBER FACTS Connecting our Communities

DTC has fiber services available

in the areas of

Bainbridge	Bloomville
Bovina	Davenport
Delhi	East Meredith
Hobart	Masonville
Meredith	Oneonta
South Kortright	Sidney Center
Trout Creek	Walton

DTC continues to construct fiber in all of our service areas

Fiber Facts

- Information is coded in a beam of light and sent through a special cable known as optical fiber cables
- The signal is light and the medium is the cable in this method of transmission.
- Optical fiber cables are made of clear plastic or a flexible glass that allows light to travel through easily
- Fiber optics is more reliable, and can carry information further than copper cables
- Fiber optics can carry more than 1000x the bandwidth (speed) of copper cable

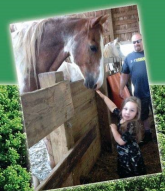

Every Summer Saturday, 11:00 am, join us for a walking tour, meet the 80+ rescued horses living happily in our mountain home.

TOUR Rosemary Farm Sanctuary

1646 Roses Brook Rd
S. Kortright NY
607-538-1200

Come enjoy a unique visit to a magical place, where horses get to be horses. Every summer Saturday, no reservations required! 11 am sharp!

BEWARE
